13 Our Objectives

Who are we?

AppsTCH is an Egypt-based enterprise technology services company focused on helping organizations realize measurable value from enterprise applications.

Our core strength is the combination of enterprise application expertise, industry knowledge, implementation capability, and long-term support.

We work across the enterprise technology lifecycle—from advisory and solution design through implementation, migration, upgrades, enablement, and ongoing support.

Our focus is practical: connect business priorities with technology execution and accelerate time-to-value.

Why AppsTCH

CLIENT-CENTRIC DELIVERY
We align delivery with business outcomes, not technology deployment alone.

ENTERPRISE APPLICATION EXPERTISE
Our teams combine functional, technical, project-management, and industry capabilities across major enterprise platforms.

INDUSTRY UNDERSTANDING
Our experience spans energy, chemicals & petrochemicals, engineering & construction, manufacturing, consumer goods, and financial services.

TIME-TO-VALUE
We apply proven methodologies, reusable knowledge, and lessons learned to reduce delivery friction and accelerate benefit realization.

CONTINUITY
We support clients beyond go-live through knowledge transfer, application upgrades, managed support, and continuous improvement.

Our Approach to Success

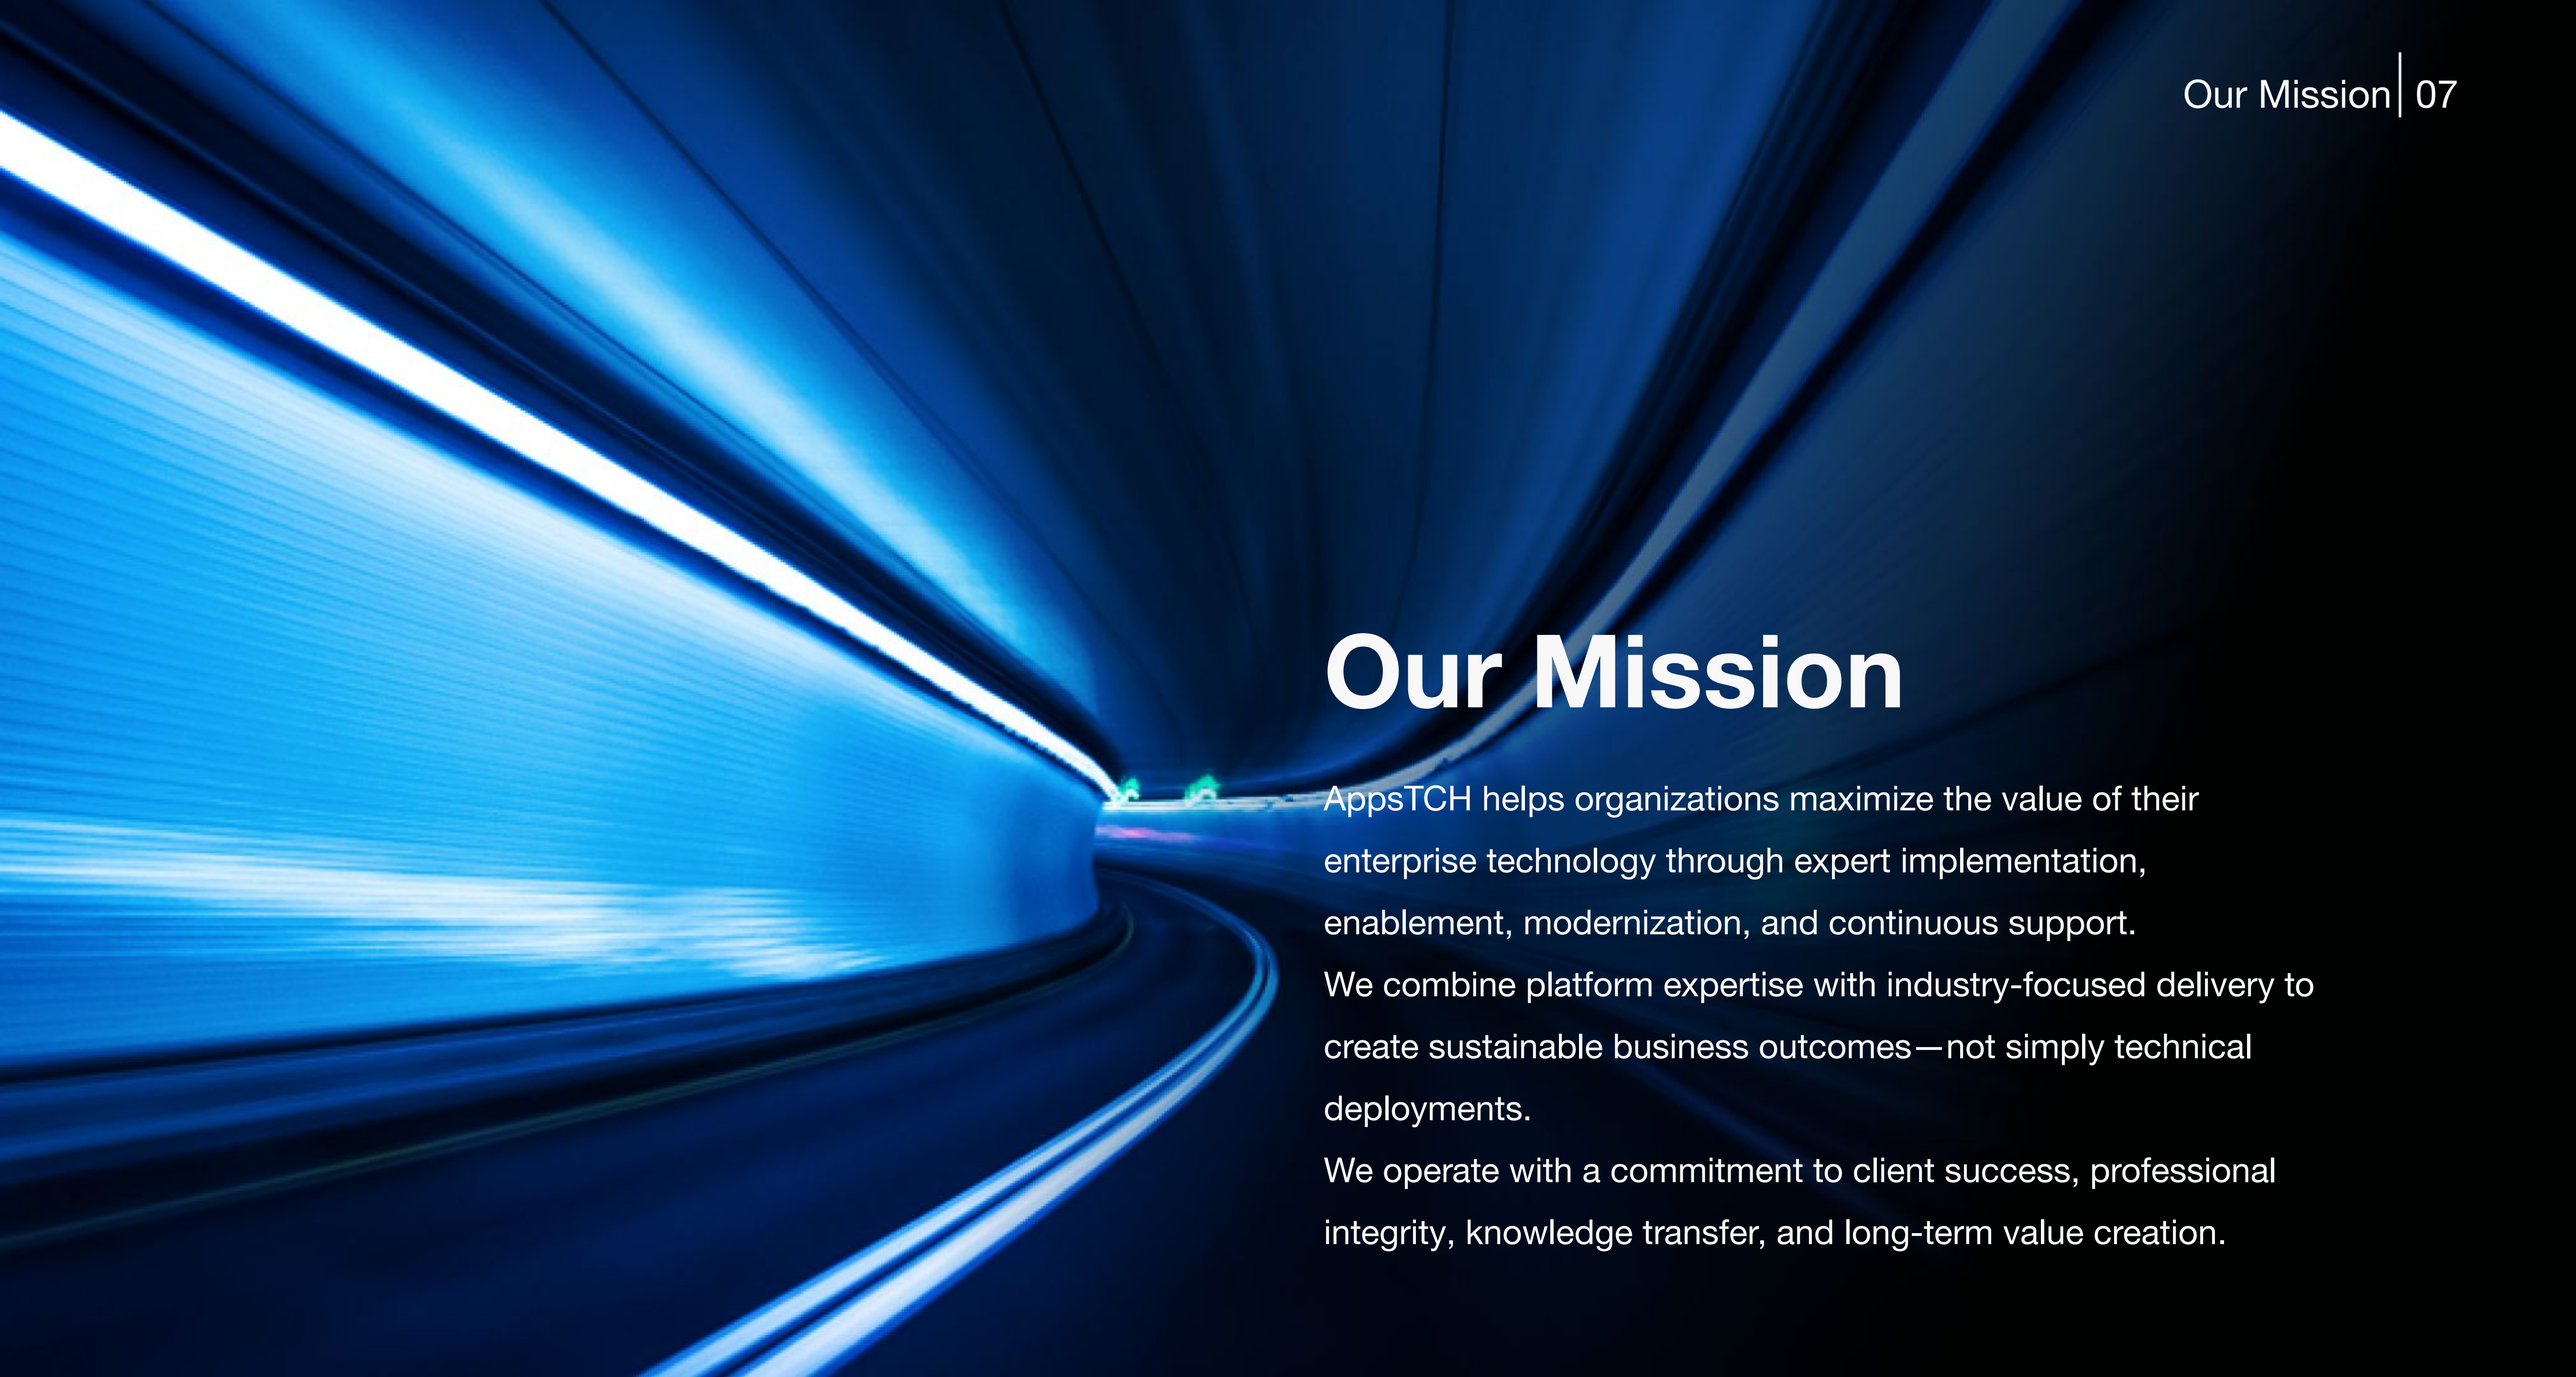

Our Vision

To be a trusted enterprise technology partner across the region, helping organizations turn software investments into measurable business outcomes.

We bridge business strategy and technology execution through experienced people, proven delivery practices, industry knowledge, and practical innovation.

Our ambition is simple: help clients achieve operational excellence, improve agility, and realize value faster.

Our Mission

AppsTCH helps organizations maximize the value of their enterprise technology through expert implementation, enablement, modernization, and continuous support.

We combine platform expertise with industry-focused delivery to create sustainable business outcomes—not simply technical deployments.

We operate with a commitment to client success, professional integrity, knowledge transfer, and long-term value creation.

Management Team:

AppsTCH's success is driven by our exceptional management team, composed of seasoned industry veterans with a proven track record of delivering results. Our leaders have been instrumental in shaping the ICT landscape in Egypt and bring a wealth of experience to every project. By investing in our team's continuous growth and development, we foster a culture of innovation and excellence. Our collective expertise empowers us to deliver tailored solutions that exceed client expectations.

Technical Team

In today's economic environment, however, a company's value depends less on tangible assets and more on intangible ones such as its human capital. Technological Capacity can only be built by people with Human Capacity, who are continuously building up that capacity, through learning and hard work. AppsTCH management team has been carefully looking out for and supporting the ICT industry even before its creation by contributing to the success of their former organizations.

AppsTCH's management team boasts a wealth of experience spanning various industries and technical solutions, making us uniquely qualified to deliver comprehensive ERP services. Our team members have successfully implemented and supported our solutions across diverse business industries and sectors.

Our team's technical expertise extends to a wide range of

To ensure our consulting team remains at the forefront of technology and industry best practices, we invest heavily in ongoing education and certification programs. Our team members regularly participate in training sessions, webinars, and conferences to stay updated on the latest trends and innovations. Additionally, we encourage our consultants to pursue industry certifications, such as SAP Certified Application Associate and Oracle Certified Implementation Specialist, to validate their expertise and enhance their credibility. This commitment to continuous learning allows our consulting team to deliver high-quality services and provide our clients with the most effective solutions. By staying informed and up-to-date, we can offer valuable insights and guidance, helping our clients achieve their business objectives.

SOLUTIONS VALUE

BUSINESS SOLUTIONS

Empowering Your Business

Align your strategy, optimize operations, and drive growth with AppsTCH's SAP solutions.

SAP ERP is the cornerstone of modern businesses. By leveraging SAP's powerful platform, we help organizations streamline processes, gain valuable insights, and adapt swiftly to industry changes.

WHAT DIFFERENTIATES APPSTCH

Five things that shape how we work with clients, from first engagement through the life of the platform.

ONE PARTNER ACROSS THE ERP LIFECYCLE

From advisory and implementation through modernization, enablement, and support.

BUSINESS + TECHNOLOGY

We connect process expertise with platform and technical capability.

LOCAL DELIVERY, REGIONAL AMBITION

Egypt-based delivery capability with a focus on serving organizations across the Middle East.

VALUE-FIRST MINDSET

Success is measured by business outcomes, adoption, operational improvement, and realized value—not simply by go-live.

LONG-TERM RELATIONSHIPS

We aim to remain a trusted delivery and support partner as clients evolve their enterprise landscape.

One partner, one accountable team, from strategy to steady-state operations.

2026 POSITIONING

AppsTCH is positioned as an enterprise applications and digital solutions partner focused on one outcome:

REALIZING THE VALUE OF ENTERPRISE TECHNOLOGY — FASTER.

OUR GROWTH PRIORITIES ARE CENTERED ON:

- SAP transformation and lifecycle services
- Oracle technology and application services
- ERP modernization, migration and upgrades
- Business-process automation
- Project and construction technology
- Managed application support
- Expansion across Egypt and the Middle East

We combine experienced people, proven delivery practices, and industry understanding to turn enterprise technology into practical business value.
