Who are we?

AppsTCH is an Egypt-based enterprise technology services company focused on helping organizations realize measurable value from enterprise applications.

Our core strength is the combination of enterprise application expertise, industry knowledge, implementation capability, and long-term support.

We work across the enterprise technology lifecycle—from advisory and solution design through implementation, migration, upgrades, enablement, and ongoing support.

Our focus is practical: connect business priorities with technology execution and accelerate time-to-value.

Why AppsTCH

CLIENT-CENTRIC DELIVERY
We align delivery with business outcomes, not technology deployment alone.

ENTERPRISE APPLICATION EXPERTISE
Our teams combine functional, technical, project-management, and industry capabilities across major enterprise platforms.

INDUSTRY UNDERSTANDING
Our experience spans energy, chemicals & petrochemicals, engineering & construction, manufacturing, consumer goods, and financial services.

TIME-TO-VALUE
We apply proven methodologies, reusable knowledge, and lessons learned to reduce delivery friction and accelerate benefit realization.

CONTINUITY
We support clients beyond go-live through knowledge transfer, application upgrades, managed support, and continuous improvement.

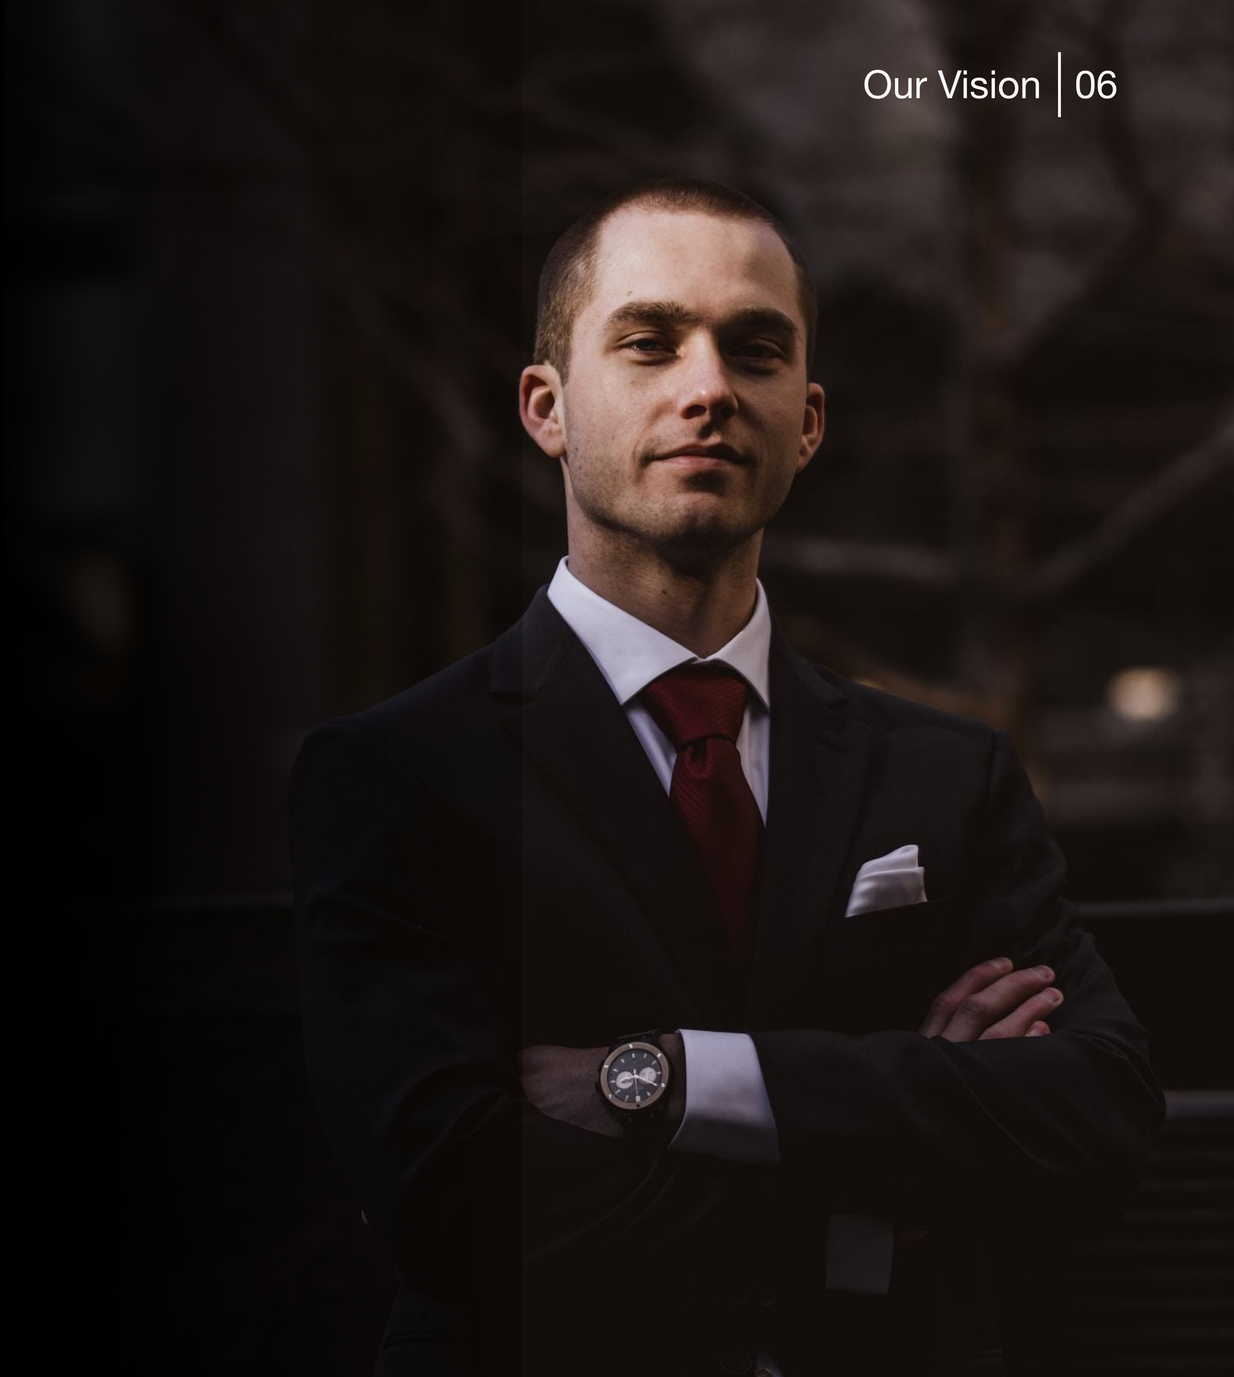

Our Approach to Success

Our Vision

To be a trusted enterprise technology partner across the region, helping organizations turn software investments into measurable business outcomes.

We bridge business strategy and technology execution through experienced people, proven delivery practices, industry knowledge, and practical innovation.

Our ambition is simple: help clients achieve operational excellence, improve agility, and realize value faster.

Our Mission

AppsTCH helps organizations maximize the value of their enterprise technology through expert implementation, enablement, modernization, and continuous support.

We combine platform expertise with industry-focused delivery to create sustainable business outcomes—not simply technical deployments.

We operate with a commitment to client success, professional integrity, knowledge transfer, and long-term value creation.

Leadership & Delivery Capability

Our leadership brings extensive experience across enterprise technology, ICT, ERP transformation, and business solutions.

Our delivery organization combines:

- Functional consultants and business-process specialists
- Technical and integration specialists
- Project and program management
- ERP application and database expertise
- Training and knowledge-transfer capability
- Application support and operational services

We invest continuously in skills, certifications, delivery methods, and knowledge sharing so our teams remain aligned with evolving enterprise platforms.

knowledge transfer, and ongoing support

BUSINESS SOLUTIONS

SAP PARTNER | CONSULT & IMPLEMENT

AppsTCH is listed by SAP as a Consult and Implement partner in Egypt, with expertise spanning ERP consulting & implementation, education and knowledge transfer, data integration/migration, data management, and SAP ERP application upgrades

- SAP S/4HANA transformation and application services
- RISE with SAP / private-cloud transformation support
- GROW with SAP / public-cloud transformation support
- SAP Business One
- Application modernization, migration, upgrades and ongoing support

AppsTCH combines local delivery capability with SAP platform expertise to help clients move from ERP investment to measurable business value.

ORACLE
TECHNOLOGY SOLUTIONS

TECHNOLOGY-LED ORACLE SERVICES

AppsTCH's Oracle offering is positioned around Oracle Technology Solutions, with services spanning:

- Oracle Database management, administration and performance
- Data integration and migration
- Data management and data quality
- Oracle ERP application support and upgrades
- Technical consulting and ongoing maintenance

AppsTCH helps organizations protect and extend the value of Oracle environments through practical technology expertise and lifecycle services.

Primavera

Optimize project performance and deliver exceptional results with AppsTCH's Primavera solutions.

AppsTCH supports engineering and construction organizations with Primavera-based project planning and controls.

Core capabilities include:
- Project planning and scheduling
- Resource planning and allocation
- Progress monitoring
- Risk management
- Cost and budget control
- Stakeholder collaboration
- Project-performance visibility

The objective is to give project organizations better control of schedule, cost, risk, resources, and delivery performance.

The objective is to give project organizations better control of schedule, cost, risk, resources, and delivery performance.

Business Automation & Managed Procurement

BUSINESS AUTOMATION:
We use visual development and workflow automation approaches to help organizations digitize repetitive processes, connect applications, and deliver business applications faster.

MANAGED PROCUREMENT:
Our procurement automation proposition is designed to streamline supplier collaboration and improve cost control, compliance, transparency, and operational efficiency.

Both propositions extend AppsTCH beyond ERP implementation into the broader business-process automation agenda.

Services:From Transformation to Value Realization

Unlocking the Power of Your Software Investments

ADVISORY & CONSULTING
Business-process assessment, solution advisory, roadmap definition, and transformation planning.

IMPLEMENTATION & SYSTEM INTEGRATION
Project management, business-process design, solution design/build, testing, integration, deployment, and go-live.

MIGRATION & MODERNIZATION
Data migration, technical/functional upgrades, data quality, master-data management, and application modernization.

EDUCATION & KNOWLEDGE TRANSFER
Role-based training, knowledge transfer, user enablement, and adoption support.

APPLICATION SUPPORT
Structured incident, problem, change, and service-management capabilities to sustain business operations after go-live.

WHAT DIFFERENTIATES APPSTCH

Five things that shape how we work with clients, from first engagement through the life of the platform.

ONE PARTNER ACROSS THE ERP LIFECYCLE

From advisory and implementation through modernization, enablement, and support.

BUSINESS + TECHNOLOGY

We connect process expertise with platform and technical capability.

LOCAL DELIVERY, REGIONAL AMBITION

Egypt-based delivery capability with a focus on serving organizations across the Middle East.

VALUE-FIRST MINDSET

Success is measured by business outcomes, adoption, operational improvement, and realized value—not simply by go-live.

LONG-TERM RELATIONSHIPS

We aim to remain a trusted delivery and support partner as clients evolve their enterprise landscape.

One partner, one accountable team, from strategy to steady-state operations.

2026 POSITIONING

AppsTCH is positioned as an enterprise applications and digital solutions partner focused on one outcome:

REALIZING THE VALUE OF ENTERPRISE TECHNOLOGY — FASTER.

OUR GROWTH PRIORITIES ARE CENTERED ON:

- SAP transformation and lifecycle services
- Oracle technology and application services
- ERP modernization, migration and upgrades
- Business-process automation
- Project and construction technology
- Managed application support
- Expansion across Egypt and the Middle East

We combine experienced people, proven delivery practices, and industry understanding to turn enterprise technology into practical business value.
